## How to measure your body

To determine your clothing size you must measure your body measurement, following the instructions below.

- 1. Centilong**  
Measure from top of the head and down to the floor.
- 2. Chest**  
Measure around the fullest part of your chest, holding the measuring tape horizontal.
- 3. Waist**  
Measure around the narrowest part of your waist, holding the measuring tape horizontal.
- 4. Hip**  
Measure around the fullest part of your hip, while standing up with you feet together, holding the measuring tape horizontal.
- 5. Inseam**  
Measure your inside leg length from crotch and down to the floor, while standing up straight with your feet slightly apart.

## How to choose the right size

If your body measurements for chest and waist do not correspond with the same size, then choose the size which is closest to your chest measurement. If your are in between to sizes, then choose the smallest size for a tight fit or the bigger size for a loose fit.
